Evaluation and conclusion: As expected, it didn't put a strain on the machine's performance throughout our tests, since it required low CPU and RAM to work properly. It decrypted passwords instantly without freezing, crashing or showing error dialogs. I am using BSNL Router as port forward and access my remote sites by accessing from my local IP (192.168.10.1) and my ISP used Private VNet. I am unable to forward 3389 to my local IP address (192.168.10.1). I used 192.168.10.1 as dns domain name and configured my router as 192.168.10.2 as gateway. My ISP used to configure these as default values. I have changed the dns domain name to 8.8.8.8. I am using BSNL Router Firmware (1.4.5 - July 2017). I am having trouble with BSNL configuration, there's no option to configure the port 3389 in BSNL Configuration page. I don't know how to access Port configuration. How can I change port number and password? I am using Broadsoft and NetComm IP Phones. How can I configure my Router to use different DNS server? I am using broadband and netcomm IP Phones. I am using 2 DNS server with broadband connection, one from ISP and other from my service provider. How can I change port number and password? I am using Broadsoft and NetComm IP Phones.
